Special Temporary Authority (STA)
BESTA-20190318ABE

Dear Mr. Davis:

This is in reference to the request filed on March 18, 2019. CCL requests an extension of the STA granted on October 3, 2018, to continue operating at night with parameters at variance to allow time to complete all required repairs/modifications.¹ In support of the request, CCL states that additional time is needed to resolve issues with the nighttime antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and CCL may continue to operate with nighttime with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits, with no change to the

licensed daytime operation. CCL must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310. CCL must submit an e-mail to my attention to certify the date the station resumed licensed operations per BZ- 20100831ACI with negligible changes.

This authority expires on **October 8, 2019**.
